阳光房造型分类:

单斜顶阳光房 \ 造型顶阳光房

组合顶阳光房 \ 特殊顶阳光房

所谓的阳光房是对别墅、复式楼露台等高档居住空间的二度创作，阳光房俗称玻璃房，阳光房可以搭建在复式楼的露台，一楼的私人花园，楼宇的顶层，私人别墅等地。它的建筑立面甚至包括顶部，全部为玻璃结构。由于房间要采光通风，而且要有很好的密封效果，阳光房立面、顶部大部分由可开启的门窗组合，门窗质量的优劣决定着阳光房构建的成功与否。基于阳光房的如上特点，我们在设计和建筑阳光房时，对于不同用途的阳光房在整体造型及结构方面，应视周围环境和场地的制约而定，再设计出相应的阳光房造型方案。

The so-called sunshine room is the two degree creation of high grade residential space such as villas, compound buildings and other buildings. The sunshine room is commonly known as glass house. The sunshine room can be built on the terrace of the compound building, the private garden on the first floor, the top floor of the building, the private villa and so on. Its facade includes even the top, all of which are glass structures. Because of the room to light and ventilation, and to have a good sealing effect, the front of the sun room, the top is mostly open door and window combination, the quality and quality of the door and window determines the success of the building of the sun room. Based on the characteristics of the sun room, we should design and build the sun room, for the different uses of the sun room in the overall modeling and structure, should be based on the surrounding environment and the constraints of the site, and then the design of the corresponding design of the sun room.
